PERSONAL PROJECTS **Westgate Attack** 2013
Master project

Visualization about the Westgate shopping mall attack case that took place in Nairobi, Kenya, during 21-24 September 2013. This project analyzed around 700'000 Tweets and tried to describe the events through the users' behavior. The beta can be found: <http://lstout.github.io/westgate/html/>.

A new massive data analytics approach to football 2013
Master project

Small framework of tools which enables the coaches to base their new strategies not only on their intuition and judgment, but also on comprehensive (and maybe not human-eye visible) statistics. The framework is composed by a training clustering, a trajectories clustering, a speed performance analysis and a passages pattern visualization.
